Manchester United Analysis 22-23

Deepesh DWIVEDI

Data Sources

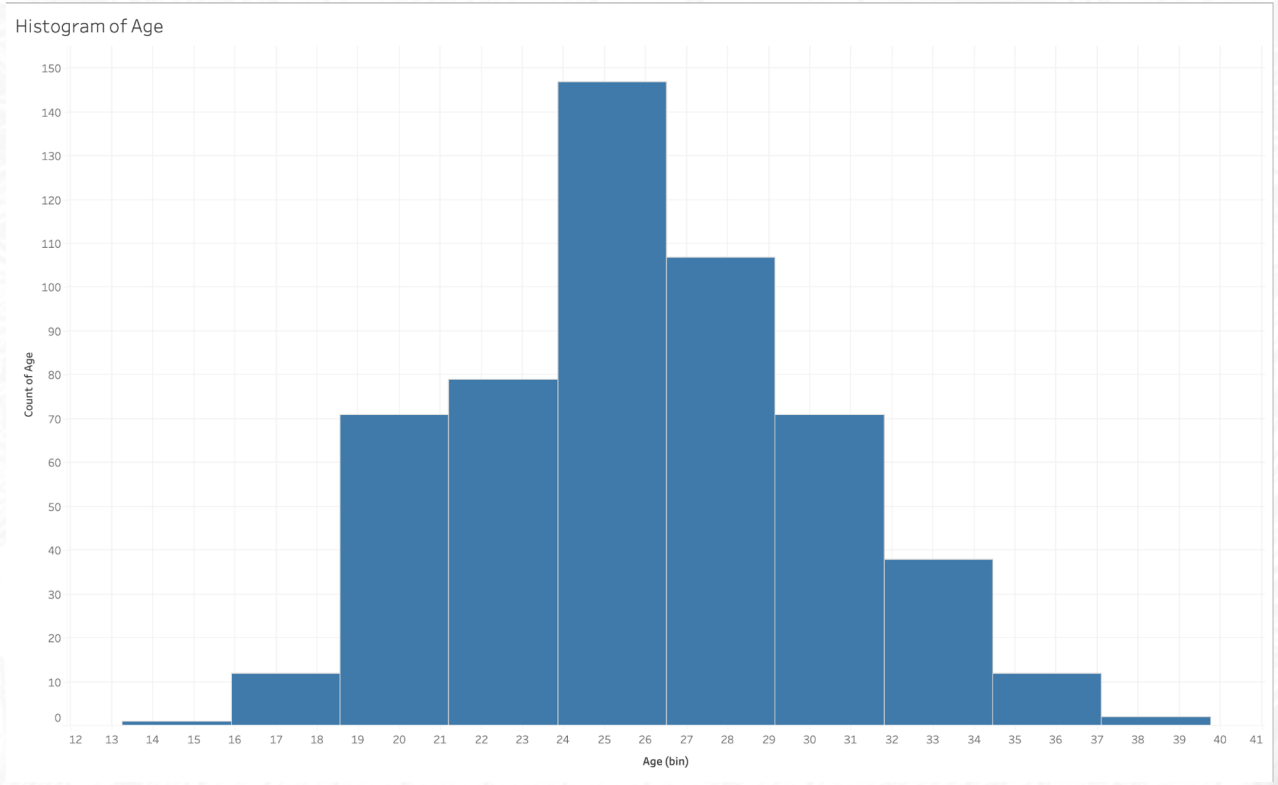
- Football Manager Scout for players
- Kaggle for 22-23 team statistics.
- Computed relevant statistics referring from Opta.

Objective

- Manchester United astonishingly lack expert scouts.
- Suggesting players based on purely computed statistics.
- Manchester United have a history of paying enormous amount for incompatible players.

Age Distribution

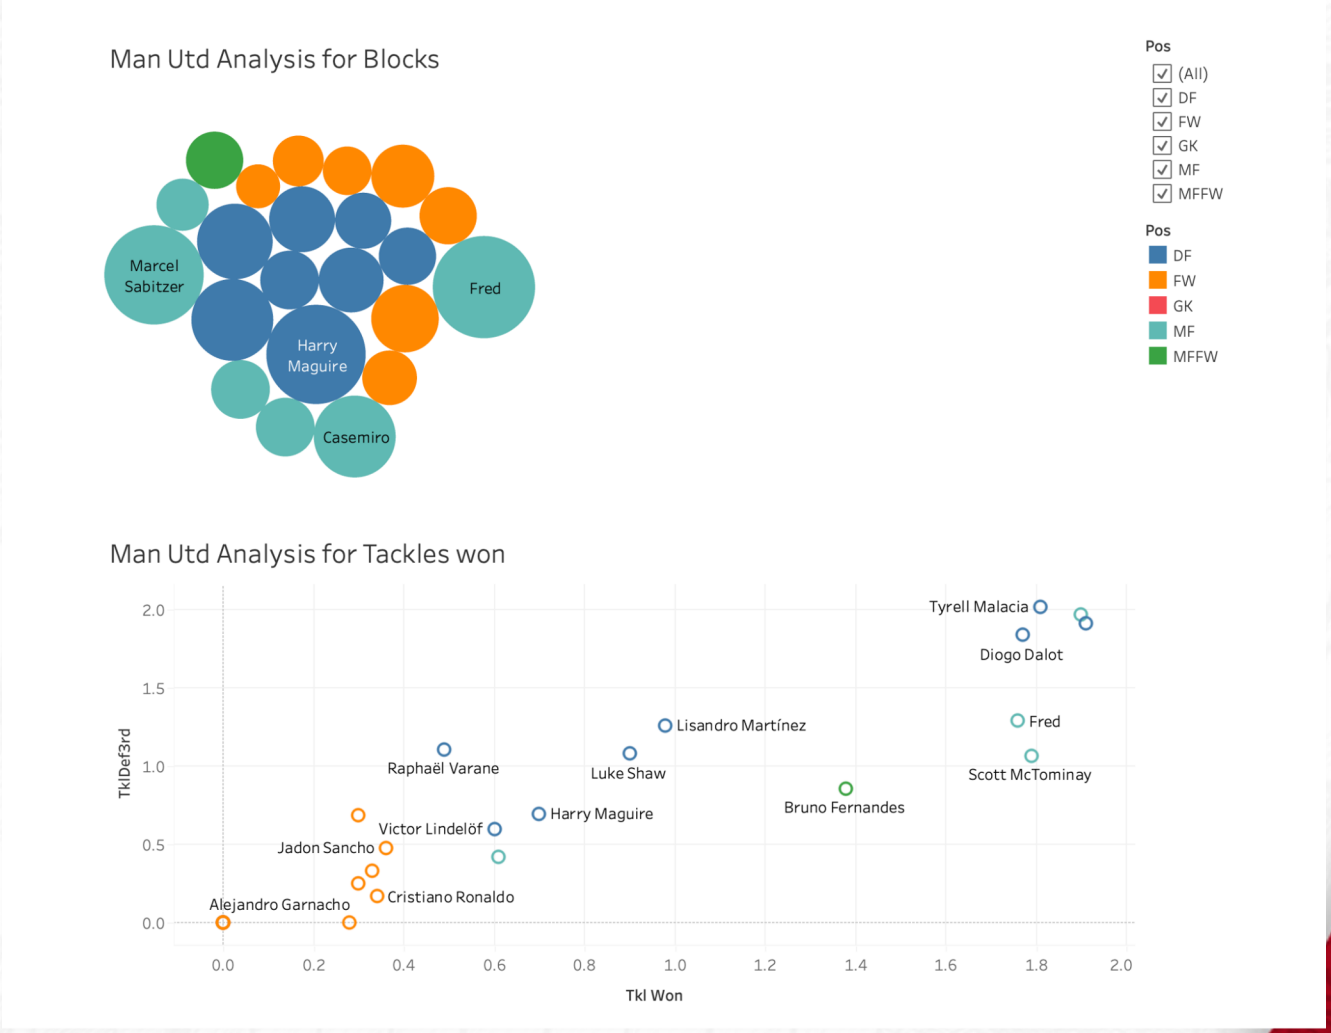
- Mean Age in Europe is between 24-26.
- This is the age when players hit their prime.



Manchester United Analysis

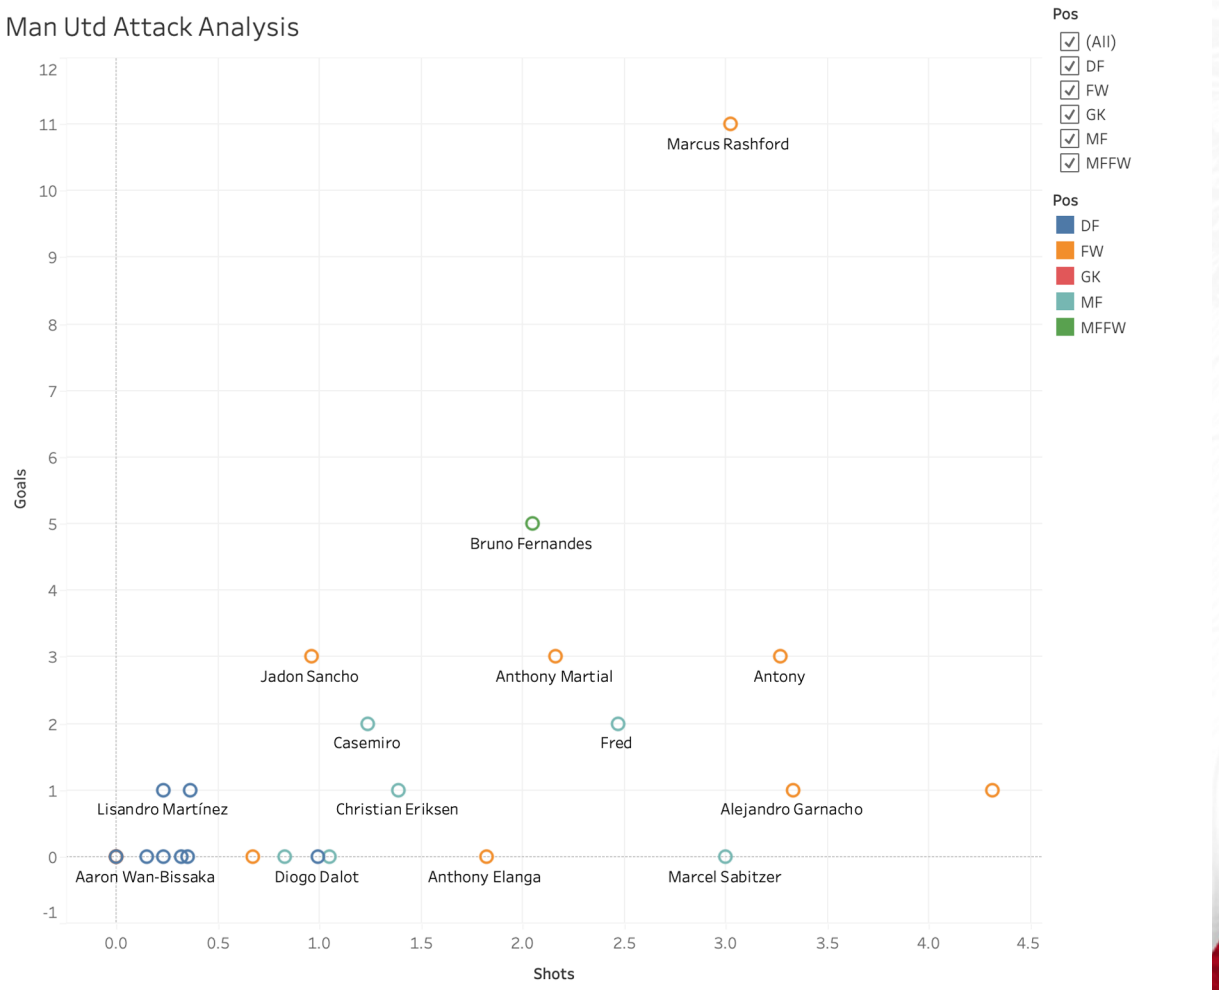
Man Utd Analysis Defense

- Dashboard of all players for their defense attributes.
- Only 1 defender with significant blocks.



Man Utd Analysis Attack

- Marcus Rashford in top notch form.
- Still need more clinical goal scoring players.



Competitor Analysis

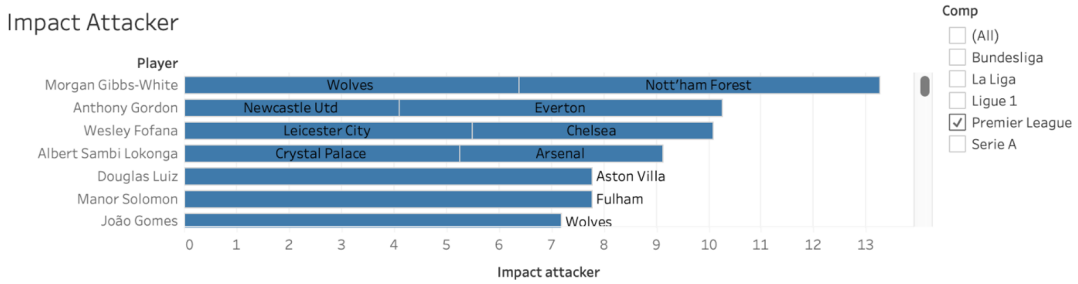
Man Utd Competitor Analysis

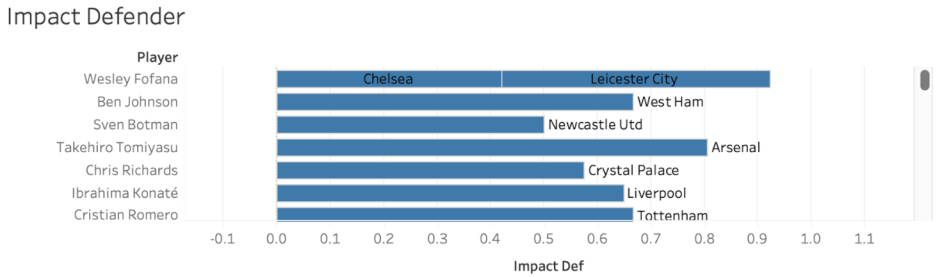
- Key Indicators to compare important statistics
- United significantly lagging behind their main rivals in important statistics.

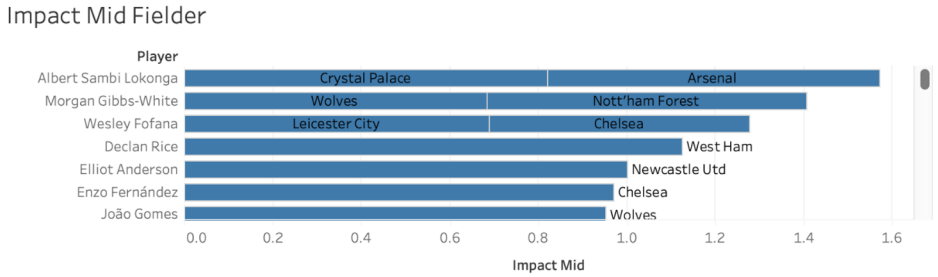
My Recommendations

Impact Players

- Young players under 23.
- Impact is calculated based on relevant statistics.
- Market price of these players are cheap.
- Show amazing potential.

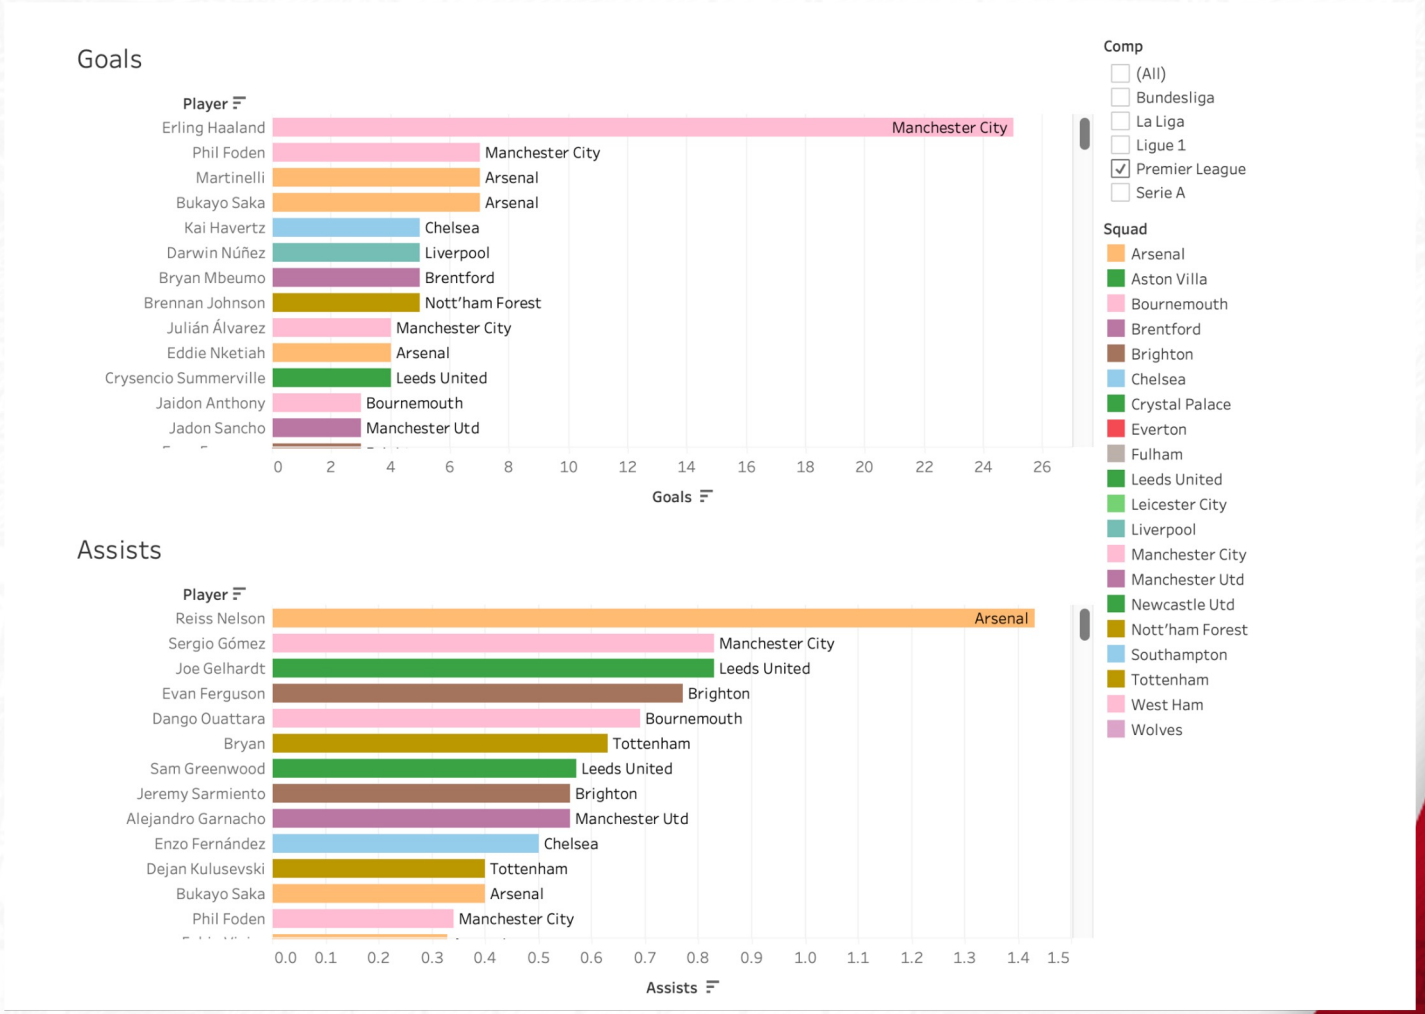






Current Young Attackers

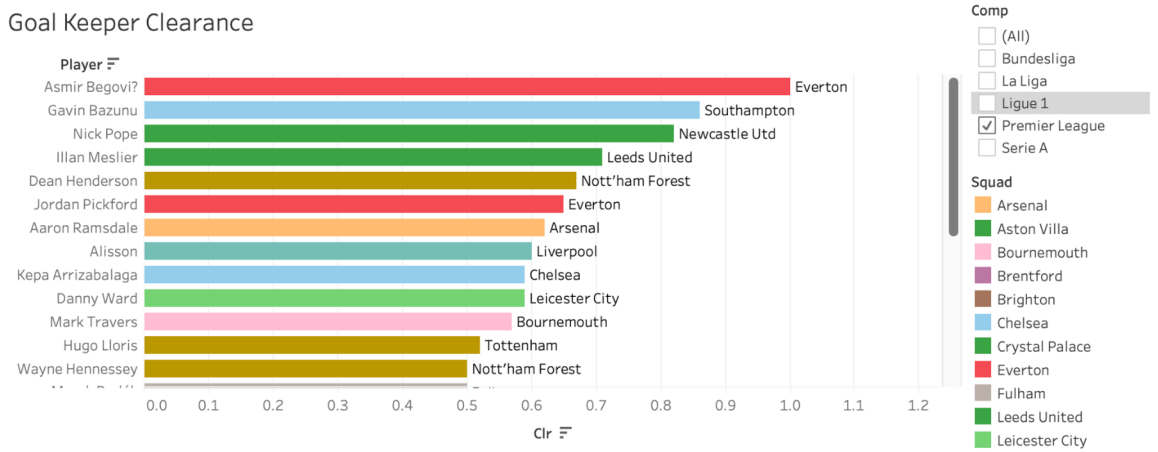
- Dashboard of young prolific strikers and Attacking mid fielders under 23.
- United can enter the market this season for these targets.
- Can be a cost effective option.

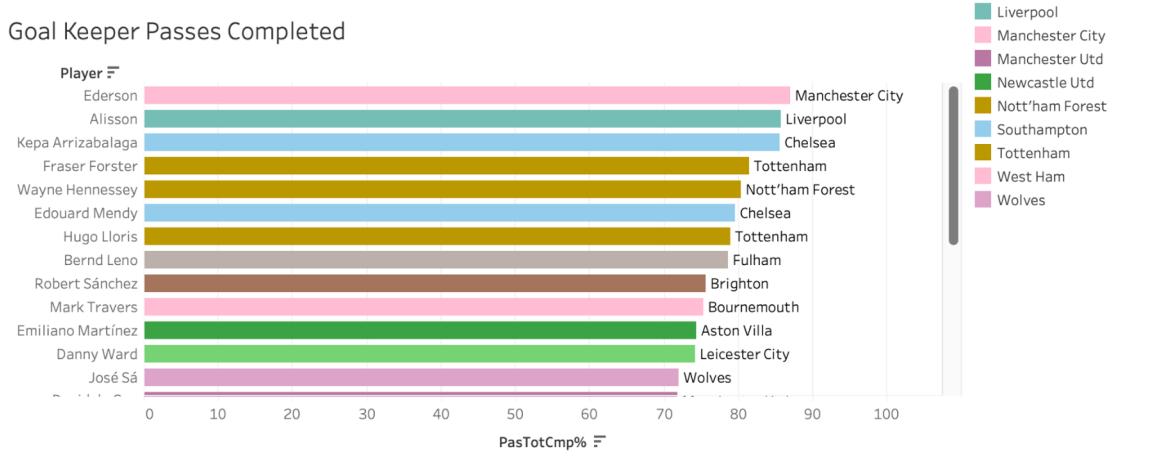


Goal Keeper Analysis

Goal Keeper Analysis

- In modern football, you need GKs who can command the box and at the same time pass it properly.
- These are the list of GKs which are more valuable than others.
- Man Utd need to address this as well.





Conclusion

- Most of the times going Moneyball in any sport pays well.
- Deeper analysis based on relevant factors on players which can improve Manchester United for title in the upcoming season.
- Results suggested by analysis is verified with FM Scout.
